

SAMA RAGHU

JAVA DEVELOPER

+91 9885670911 | raghusama99@gmail.com | Hyderabad

Objective

Back-End Developer with 3 years of experience in Java and Spring Boot, skilled in building scalable applications, RESTful APIs, and microservices. Passionate about learning and improving application performance

Technical Skills

- **Programming Languages:** Core Java, Java 8
- **Frameworks & Libraries:** Spring Boot, JDBC
- **Databases:** MongoDB, MySQL
- **APIs & Web Services:** REST APIs
- **Tools & IDEs:** IntelliJ IDEA, Visual Studio Code, Postman, GIT, Jira
- **Methodologies & Others:** Agile

Experience Summary

- 3 years of back-end development experience specializing in Java and Spring Boot.
- Developed back-end services for the Unified User Experience System (UES), optimizing insurance policy management.
- Extensive hands-on experience with RESTful API development using Spring Boot, ensuring efficient communication between front-end and back-end.
- Recognized with "Difference Maker" and "Extra Miler" awards at SmartIMS for delivering impactful solutions and consistently exceeding expectations within six months of joining.
- Strong collaboration skills, effectively working with cross-functional teams, including UX/UI designers and front-end developers, to ensure smooth integration and feature delivery.
- Experienced in Agile methodologies, actively participating in sprint planning and contributing to timely feature completion.

Projects

Project: UES (Unified User Experience System)

Organization: Smart IMS

Description: Unified User Experience System (UES) is a sophisticated web application designed to centralize insurance policy management, catering to users' needs for convenient access to policies across multiple insurance providers. Through this platform, users can efficiently view, manage, and file claims for their various insurance policies, enhancing their overall insurance experience.

Tech Stack: Core Java, Java 8, Spring Data JPA, Hibernate, My SQL, Mongo DB

Project: Preferred Risk

Organization: Smart IMS

Description: Preferred Risk is a production project focused on providing insurance customers with a reliable platform for managing their policies. Built using Java, the application allows users to access, manage, and file claims for their insurance policies. My role involves addressing and resolving bugs reported in the system to ensure smooth and uninterrupted service for the end users.

Tech Stack: Core Java, RESTful APIs

Education

Bachelor of Technology, Mechanical Engineering | Jawaharlal Nehru Technological University
Hyderabad | July 2017 – August 2020

Work Experience

Associate Software Engineer - I

SmartIMS | April 2022 – April 2025
